

Use Case #2

Name: Entering Work Schedule

Description: The manager is able to enter and edit the work schedule of their barbers. This ensures that the schedule of available timeslots shown to the customers when they are creating an appointment is as accurate as possible.

Sunny Day Flow:

- Manager logs in to system.
- Manager selects edit schedule option.
- System displays calendar display.
- Manager selects month they wish to edit.
- System displays calendar for desired month and options to input and edit each day's available barbers and timeslots.
- Manager inputs barbers' available hours.
- System displays confirmation options for each barber to ensure correct inputs.
- Once manager is done, confirm changes option is selected.
- System then updates calendar timeslots and displays timeslots on calendar view.

Pre-conditions:

- Manager must have valid login with managerial permissions.

Post-conditions:

- System updates available timeslots on both business and customer sides of the calendar view.
